

## FLOW

The flow table is perfect for supervising a group of maximum of six students. The teacher in the centre can easily turn towards anyone who needs attention. At the same time, interaction between the group is still possible. This creates a relaxed way of working together which results in a pleasant group atmosphere. Game playing, craft work, teamwork,... the flow table is the ideal solution.

R50

R35

The top consists of laminate on solid birch plywood or Durapan with extra anti-wear layer on chipboard core with a plastic edge of 2mm with only a single seam. Both options are water-resistant, solid and durable.

Solid and durable: Not just four legs under a top but a sturdy steel frame as well, giving it a strong and stable construction. The table can be easily moved and does not wobble.

Is the Flow table not going to be used for a while? Then push two of these tables together into a large group table.

Small details can prevent major annoyances: all four legs are fitted with adjustable feet so that the table is always stable on any surface.

## Materials

### Top

#### Durapan

The top has a synthetic resin layer on both sides with extra protection from a transparent anti-scratch layer.

The core is chipboard compliant with DIN 68765/ E1. The top has a robust protective edge, 2mm thick on top, bottom and 2 mm in the corners rounded off.

The colour of the edge is matched to the top layer.

#### Plywood

The top consists of a 13-layer plywood core with a decorative plastic covering and a protective layer underneath.

The edges are sanded and varnished after rounding off to a radius of 30 mm.

### Chassis

2mm thick steel frame that forms a closed frame, with 2 U-shaped curved pairs of legs from  $\varnothing 32$ mm tube with a wall thickness of 1.5mm.

The chassis is given a wear-resistant epoxy powder coating which can be selected in various colours.

Each leg is fitted with a levelling foot so that the table legs can be adapted to any surface.

### Dimensions

The Flowtable is available in one table-top size and in various heights.

Table-top size: 120x180cm.

Total height / Table height: 50cm, 52cm, 54cm, 58cm or 76cm.
